Study ID: Guiomar_Nates_Parra_Vaccinium_meridionale_Colombia_2013

Contact: mgnatesp@gmail.com

Credit: Guiomar Nates Parra

Publication: 10.1126/science.aac7287

Number of sites: 5

Year of sampling: 2013

Crop: Vaccinium meridionale

Variety: Full information.

Location: Full information.

Country: All reported countries are OK.

Field size: Full information.

Management: Full information.

Sampling period: Full information.

Richness: Full information.

species groups considered: No taxa restrictions have been identified.

Abundance: Full information.

Visitation rate units: visits per 100 flowers and hour

Visitation rate: Full information.

Yield units: kg/shrub

Yield: Full information.

Alternative yield units: NA

Alternative yield: NA

Queries
=====

Instructions: Please, edit this file and answer the following queries within the document, one by one. Then send the edited 'Summary_report_and_queries' (with your comments) and your 'Data_ownership' (excel) file to alfonso.allen.perkins+observdataset@gmail.com before the 20th of July.

- =====
• Please check that credit information is correct and add the corresponding affiliations and acknowledgements/funding information in your 'Data_ownership' (excel) file.
• If your study is already published, please check that its DOI is correct.
• Please check that our information about the species groups considered is correct.
• Please, check that the brief description of your methodology (in your insect_sampling file) is correct.

- We assumed that sampling four pairs of adjacent trees took 5 minutes per pair (20 min total per round).
