Automatic report
=====

Study ID: Hisatomo_Taki_Fagopyrum_esculentum_Japan_2007
Contact: htaki@affrc.go.jp
Credit: Hisatomo Taki, Forestry and forest products research institute
Publication: 10.1111/j.1744-7348.2009.00326.x/10.1016/j.baae.2010.08.004
Number of sites: 15
Year of sampling: 2007
Crop: Fagopyrum esculentum
Variety: There are missing varieties (given 0 out of 15).
Location: Full information.
Country: All reported countries are OK.
Field size: Full information.
Management: Full information.
Sampling period: There are missing sampling periods.
Richness: Full information.
species groups considered: No taxa restrictions have been identified.
Abundance: Full information.
Visitation rate units: NA
Visitation rate: There are missing values (given 0 out of 15).
Yield units: seed set
Yield: Full information.
Alternative yield units: NA
Alternative yield: NA

Queries
=====

Instructions: Please, edit this file and answer the following queries within the document, one by one. Then send the edited 'Summary_report_and_queries' (with your comments) and your 'Data_ownership' (excel) file to alfonso.allen.perkins+observeddataset@gmail.com before the 20th of July.

- =====
- Please check that credit information is correct and add the corresponding affiliations and acknowledgements/funding information in your 'Data_ownership' (excel) file.
 - If your study is already published, please check that its DOI is correct.
 - If possible, please provide the names of missing crop varieties.

- If possible, please provide the sampling start month and sampling end month for each field, respectively, and use a numeric format (for example, 1 for January, 2 for February and so on).
- There are sites without visitation rate records. Please, check that such information is correct. See also the information about OBServ data processing in your ‘First read me - General report’ pdf file.
- Please check that our information about the species groups considered is correct.
- Please, check that the brief description of your methodology (in your insect_sampling file) is correct.
