Study ID: Charlie_Nicholson_Vaccinium_corymbosum_USA_2013
Contact: ccnicholson@ucdavis.edu; charlie.c.nicholson@gmail.com; Taylor.Ricketts@uvm.edu
Credit: Charlie C. Nicholson; Taylor H. Ricketts
Publication: 10.1016/j.agee.2018.10.018; 10.1016/j.agee.2017.08.030
Number of sites: 12
Year of sampling: 2013
Crop: Vaccinium corymbosum
Variety: Full information.
Location: Full information.
Country: All reported countries are OK.
Field size: Full information.
Management: Full information.
Sampling period: Full information.
Richness: Full information.
species groups considered: bombus and other wild bees
Abundance: Full information.
Visitation rate units: flower visits/m²/10 mins
Visitation rate: Full information.
Yield units: kg/ha
Yield: There are missing values (given 0 out of 12).
Alternative yield units: NA
Alternative yield: NA

Queries
=====

Instructions: Please, edit this file and answer the following queries within the document, one by one. Then send the edited 'Summary_report_and_queries' (with your comments) and your 'Data_ownership' (excel) file to alfonso.allen.perkins+observdataset@gmail.com before the 20th of July.

- =====
- Please check that credit information is correct and add the corresponding affiliations and acknowledgements/funding information in your 'Data_ownership' (excel) file.
 - If your study is already published, please check that its DOI is correct.
 - There are sites without yield. Please, check that such information is correct. If possible, please provide the missing values (or the corresponding z-scores).

- Please, check that the brief description of your methodology (in your insect_sampling file) is correct.

To estimate the (accumulated) richness and abundance per site and year, we used your insect_sampling data. Is it correct or should we use the abundance information that you sent us on 3/07/2020?
