Study ID: Carlos_H_Vergara_Coffea_arabica_Mexico_2004

Contact: carlosh.vergara@udlap.mx

Credit: Carlos H. Vergara and Ernesto I. Badano

Publication: :10.1016/j.agee.2008.08.001

Number of sites: 16

Year of sampling: 2004

Crop: Coffea arabica

Variety: There are missing varieties (given 0 out of 16).

Location: There are missing locations (given 11 out of 16).

Country: All reported countries are OK.

Field size: There are missing field sizes (given 0 out of 16).

Management: Full information.

Sampling period: Full information.

Richness: Full information.

species groups considered: No taxa restrictions have been identified.

Abundance: Full information.

Visitation rate units: visits per plant and hour

Visitation rate: Full information.

Yield units: Fruit set (%): initial number of floral buds in the respective branch and the number of developing fruits

Yield: Full information.

Alternative yield units: NA

Alternative yield: NA

Queries
=====

Instructions: Please, edit this file and answer the following queries within the document, one by one. Then send the edited 'Summary_report_and_queries' (with your comments) and your 'Data_ownership' (excel) file to alfonso.allen.perkins+observeddataset@gmail.com before the 20th of July.

- =====
• Please check that credit information is correct and add the corresponding affiliations and acknowledgements/funding information in your 'Data_ownership' (excel) file.
• If your study is already published, please check that its DOI is correct.
• If possible, please provide the names of missing crop varieties.

- If possible, please provide the area of each field [in hectares].
- If possible, please provide the latitude and longitude of the missing locations [in decimal degrees].
- Please check that our information about the species groups considered is correct.
- Please, check that the brief description of your methodology (in your insect_sampling file) is correct.
