

## Automatic report

=====

Study ID: Violeta\_Hevia\_Helianthus\_annuus\_Spain\_2017

Contact: violeta.hevia@uam.es

Credit: Violeta Hevia, Jorge Ortega, José A. González

Publication: Several projects/publications

Number of sites: 9

Year of sampling: 2017

Crop: Helianthus annuus

Variety: Full information.

Location: Full information.

Country: All reported countries are OK.

Field size: Full information.

Management: Full information.

Sampling period: Full information.

Richness: There is not enough taxonomic resolution to estimate richness.

species groups considered: only bees

Abundance: Full information.

Visitation rate units: visits per 100 flowers and hour

Visitation rate: Full information.

Yield units: seed/plant

Yield: Full information.

Alternative yield units: seed weight (g/100 seeds)

Alternative yield: Full information.

## Queries

=====

Instructions: Please, edit this file and answer the

following queries within the document, one by one.

Then send the edited 'Summary\_report\_and\_queries'

(with your comments) and your 'Data\_ownership' (excel)

file to alfonso.allen.perkins+observdataset@gmail.com

before the 20th of July.

=====

- Please check that credit information is correct and add the corresponding affiliations and acknowledgements/

funding information in your 'Data\_ownership' (excel) file.

Response: Ok, we have completed our data and send you as attached file.

- If your study is already published, please check that its DOI is correct.

Response: Our study is not published yet.

- According to our raw data, there is not enough taxonomic resolution to estimate richness.

Please, check that such information is correct. See also the information about OBServ data processing in your 'First read me - General report' pdf file.

Response: OK, the information is correct.
