Automatic report  
=====

Study ID: Charlie\_Nicholson\_Vaccinium\_corymbosum\_USA\_2014  
Contact: ccnicholson@ucdavis.edu; charlie.c.nicholson@gmail.com; Taylor.Ricketts@uvm.edu  
Credit: Charlie C. Nicholson; Taylor H. Ricketts  
Publication: 10.1016/j.agee.2018.10.018; 10.1016/j.agee.2017.08.030  
Number of sites: 13  
Year of sampling: 2014  
Crop: Vaccinium corymbosum  
Variety: Full information.  
Location: Full information.  
Country: All reported countries are OK.  
Field size: Full information.  
Management: Full information.  
Sampling period: Full information.  
Richness: Full information.  
species groups considered: bombus and other wild bees  
Abundance: Full information.  
Visitation rate units: flower visits/m<sup>2</sup>/10 mins  
Visitation rate: Full information.  
Yield units: kg/ha  
Yield: There are missing values (given 9 out of 13).  
Alternative yield units: NA  
Alternative yield: NA

Queries  
=====

Instructions: Please, edit this file and answer the following queries within the document, one by one. Then send the edited 'Summary\_report\_and\_queries' (with your comments) and your 'Data\_ownership' (excel) file to alfonso.allen.perkins+observdataset@gmail.com before the 20th of July.

- =====  
  - Please check that credit information is correct and add the corresponding affiliations and acknowledgements/funding information in your 'Data\_ownership' (excel) file.
  - If your study is already published, please check that its DOI is correct.
  - There are sites without yield. Please, check that such information is correct. If possible, please provide the missing values (or the corresponding z-scores).

- Please, check that the brief description of your methodology (in your insect\_sampling file) is correct.

To estimate the (accumulated) richness and abundance per site and year, we used your insect\_sampling data. Is it correct or should we use the abundance information that you sent us on 3/07/2020?
