Study ID: Juliana_Hipólito_Coffea_arabica_Brazil_2014

Contact: jhdsousa@yahoo.com

Credit: Juliana Hipólito, Blandina Viana (Universidade Federal da Bahia)

Publication: 10.1016/j.agee.2017.09.038

Number of sites: 22

Year of sampling: 2014

Crop: Coffea arabica

Variety: There are missing varieties (given 0 out of 22).

Location: UTM zone is needed. There are missing locations (given 0 out of 22).

Country: There are no locations to check.

Field size: There are missing field sizes (given 21 out of 22).

Management: Full information.

Sampling period: There are missing sampling periods.

Richness: Full information.

species groups considered: No taxa restrictions have been identified.

Abundance: Full information.

Visitation rate units: visits per 100 flowers and hour

Visitation rate: Full information.

Yield units: bags/hectare

Yield: Full information.

Alternative yield units: NA

Alternative yield: NA

Queries
=====

Instructions: Please, edit this file and answer the following queries within the document, one by one. Then send the edited 'Summary_report_and_queries' (with your comments) and your 'Data_ownership' (excel) file to alfonso.allen.perkins+observeddataset@gmail.com before the 20th of July.

- =====
• Please check that credit information is correct and add the corresponding affiliations and acknowledgements/funding information in your 'Data_ownership' (excel) file.
• If your study is already published, please check that its DOI is correct.
• If possible, please provide the names of missing crop varieties.
• If possible, please provide the area of each field [in hectares].

- If possible, please provide the sampling start month and sampling end month for each field, respectively, and use a numeric format (for example, 1 for January, 2 for February and so on).
- If possible, please provide the latitude and longitude of the missing locations [in decimal degrees].
- Please check that our information about the species groups considered is correct.
- Please, check that the brief description of your methodology (in your insect_sampling file) is correct.
