Study ID: Alexandra_Maria_Klein_Prunus_dulcis_USA_2009

Contact: alexandra.klein@nature.uni-freiburg.de

Credit: Alexandra-Maria Klein

Publication: 10.1038/ncomms8414

Number of sites: 15

Year of sampling: 2009

Crop: Prunus dulcis

Variety: There are missing varieties (given 14 out of 15).

Location: Full information.

Country: All reported countries are OK.

Field size: There are missing field sizes (given 0 out of 15).

Management: There are missing results for management (given 0 out of 15).

Sampling period: Full information.

Richness: Full information.

species groups considered: mostly bees

Abundance: Full information.

Visitation rate units: visited flowers per hour

Visitation rate: Full information.

Yield units: NA

Yield: NA

Alternative yield units: NA

Alternative yield: NA

Queries
=====

Instructions: Please, edit this file and answer the following queries within the document, one by one. Then send the edited 'Summary_report_and_queries' (with your comments) and your 'Data_ownership' (excel) file to alfonso.allen.perkins+observdataset@gmail.com before the 20th of July.

- =====
- Please check that credit information is correct and add the corresponding affiliations and acknowledgements/funding information in your 'Data_ownership' (excel) file.
 - If your study is already published, please check that its DOI is correct.
 - If possible, please provide the names of missing crop varieties.
 - If possible, please provide the area of each field [in hectares].

- If possible, please assign a management category [organic, IPM, conventional] to each field.
- Please, check that the brief description of your methodology (in your insect_sampling file) is correct.
- If possible, please, provide yield information.
- What is the meaning of column “# Flower Obs.”? How should I aggregate visitors and frequency to obtain visitation rates [in counts/(100 flowers hour)] per guild and site?
