Automatic report  
=====

Study ID: Luísa\_G\_Carvalho\_Helianthus\_annuus\_South\_Africa\_2009

Contact: lgcarvalho@gmail.com

Credit: Luísa G. Carvalho

Publication: Carvalho et al. 2011. Ecology Letters

Number of sites: 30

Year of sampling: 2009

Crop: Helianthus annuus

Variety: Full information.

Location: Full information.

Country: All reported countries are OK.

Field size: There are missing field sizes (given 0 out of 30).

Management: Full information.

Sampling period: There are missing sampling periods.

Richness: There are missing values (given 29 out of 30).

species groups considered: all visitors considered

Abundance: There are missing values (given 0 out of 30).

Visitation rate units: NA

Visitation rate: There are missing values (given 0 out of 30).

Yield units: fruit set (weight in g of 100 randomly selected seeds)

Yield: Full information.

Alternative yield units: NA

Alternative yield: NA

Queries  
=====

Instructions: Please, edit this file and answer the following queries within the document, one by one. Then send the edited 'Summary\_report\_and\_queries' (with your comments) and your 'Data\_ownership' (excel) file to alfonso.allen.perkins+observeddataset@gmail.com before the 20th of July.

- =====  
• Please check that credit information is correct and add the corresponding affiliations and acknowledgements/funding information in your 'Data\_ownership' (excel) file.  
• If your study is already published, please check that its DOI is correct.  
• If possible, please provide the area of each field [in hectares].

- If possible, please provide the sampling start month and sampling end month for each field, respectively, and use a numeric format (for example, 1 for January, 2 for February and so on).
- There are sites without abundance records. Please, check that such information is correct. See also the information about OBServ data processing in your ‘First read me - General report’ pdf file.
- There are sites without visitation rate records. Please, check that such information is correct. See also the information about OBServ data processing in your ‘First read me - General report’ pdf file.
- There are sites without richness estimations. Please, check that such information is correct.
- Please, check that the brief description of your methodology (in your insect\_sampling file) is correct.
