Automatic report

\_\_\_\_\_

Study ID: Betina\_Blochtein\_Brassica\_napus\_Brazil\_2011

Contact: patriciabiene@gmail.com; betinabl@pucrs.br; rosana.oliveira@pucrs.br

Credit: Betina Blochtein & Patrícia Nunes-Silva & Rosana Halinski de Oliveira

Publication: J. Pollinat. Ecol., 12 (2014), pp. 15-21

Number of sites: 6

Year of sampling: 2011

Crop: Brassica napus

Variety: Full information.

Location: Full information.

Country: All reported countries are OK.

Field size: Full information.

Management: Full information.

Sampling period: Full information.

Richness: There is not enough taxonomic resolution to estimate richness.

species groups considered: NA

Abundance: Full information.

Visitation rate units: visits per 100 flowers and hour

Visitation rate: Full information.

Yield units: kg

Yield: Full information.

Alternative yield units: NA

Alternative yield: NA

## Queries

\_\_\_\_\_\_

Instructions: Please, edit this file and answer the following queries within the document, one by one.

Then send the edited 'Summary\_report\_and\_queries' (with your comments) and your 'Data\_ownership' (excel) file to alfonce allow prelime to be several taset @grapil comparison.

 $file\ to\ alfonso. all en. perkins+observ dataset@gmail.com$ 

before the 20th of July.

- Please check that credit information is correct and add the corresponding affiliations and acknowledgements/funding information in your 'Data\_ownership' (excel) file.
- If your study is already published, please check that its DOI is correct.
- According to our raw data, there is not enough taxonomic resolution to estimate richness. Please, check that such information is correct. See also the information about OBServ data processing in your 'First read me General report' pdf file.

- Please, check that the brief description of your methodology (in your insect\_sampling file) is correct.
- We assumed that all dipterans belong to other\_flies guild. Besides, notice that results for flower-visitor density (no. flower visitors in 100 flowers), and flower-visitor richness (no. species in 30 minutes) are different from those in Garibaldi's supplementary material (Science, 2016).
