
Automatic report

Study ID: Jens_Aström_Trifolium_pratense_Norway_several_years

Contact: jens.astrom@nina.no

Credit: Jens Åström

Publication: 10.1126/science.aac7287

Number of sites: 20 Year of sampling: 2014 Crop: Trifolium pratense Variety: Full information. Location: Full information.

Country: Reported countries may contain errors.

Field size: Full information.

Management: There are missing results for management (given 0 out of 20).

Sampling period: There are missing sampling periods.

Richness: Full information.

species groups considered: No taxa restrictions have been identified.

Abundance: Full information.

Visitation rate units: visits per 100 flowers and hour

Visitation rate: Full information.

Yield units: NA

Yield: NA

Alternative yield units: NA

Alternative yield: NA

Queries

Instructions: Please, edit this file and answer the following queries within the document, one by one. Then send the edited 'Summary_report_and_queries' (with your comments) and your 'Data_ownership' (excel) file to alfonso.allen.perkins+observdataset@gmail.com before the 20th of July.

- Please check that credit information is correct and add the corresponding affiliations and acknowledgements/funding information in your 'Data_ownership' (excel) file.
- If your study is already published, please check that its DOI is correct.
- If possible, please assign a management category [organic, IPM, conventional] to each field.

- If possible, please provide the sampling start month and sampling end month for each field, respectively, and use a numeric format (for example, 1 for January, 2 for February and so on).
- If possible, check the latitude and longitude that were included in your field_level_data (csv) file. According to our automatic tests, some locations do not belong to the reported country/countries.
- Please check that our information about the species groups considered is correct.
- We assumed that (i) visit to 100 flower were measured for 5 minites in each field, and (ii) apis variables refers to honeybees.
