Study ID: Katrine_Hansen_Psidium_guajava_Thailand_2020

Contact: Katrinekvj@gmail.com

Credit: Katrine Hansen, Tuanjit Sritongchuay, Benno I. Simmons and Bo Dalsgaard

Publication: <U+FEFF>10.3390/d12060259

Number of sites: 3

Year of sampling: 2020

Crop: Psidium guajava

Variety: Full information.

Location: Full information.

Country: All reported countries are OK.

Field size: Full information.

Management: Full information.

Sampling period: Full information.

Richness: There are missing values (given 2 out of 3).

species groups considered: No taxa restrictions have been identified.

Abundance: There are missing values (given 2 out of 3).

Visitation rate units: visits per 100 flowers during 1 hour

Visitation rate: There are missing values (given 2 out of 3).

Yield units: Fruit set %

Yield: Full information.

Alternative yield units: NA

Alternative yield: NA

Queries
===
Instructions: Please, edit this file and answer the
following queries within the document, one by one.
Then send the edited 'Summary_report_and_queries'
(with your comments) and your 'Data_ownership' (excel)
file to alfonso.allen.perkins+observdataset@gmail.com
before the 20th of July.
===

- Please check that credit information is correct and add the corresponding affiliations and acknowledgements/funding information in your 'Data_ownership' (excel) file.

- If your study is already published, please check that its DOI is correct.

- There are sites without abundance records. Please, check that such information is correct. See also the information about OBServ data processing in your 'First read me - General report' pdf file.

- There are sites without visitation rate records. Please, check that such information is correct. See also the information about OBServ data processing in your 'First read me - General report' pdf file.

- There are sites without richness estimations. Please, check that such information is correct.

- Please check that our information about the species groups considered is correct.

- Please, check that the brief description of your methodology (in your insect_sampling file) is correct.

Visitation rates have been recalculated and they are in new units [visits per 100 flowers during 1 hour]. New values were estimated as follows: $100*60$ abundance_guild_site/total_sampled_flowers/total_sampled_time. Please, check that new visitation rates are correct.
